How to Draw
Inky Wonderlands

Create and Color Your Own Magical Adventure
Most flowers begin as a simple dot or circle. Each of these blooms can be drawn in five simple steps. Draw steps one through four in pencil, then go over your pencil lines in ink, adding detail and embellishments. Finally, erase the pencil lines. Practice your flowers on a sheet of paper.
Tip: Outline the spaces between the flowers to create a stained-glass effect.

Create your own unique blooms by combining bits from different flowers. Here are some ideas to get you started. Add inky details to these flowers and create a page to color.
Leaves

Foliage is just as important as flowers—ask any florist! I use variations of these five basic leaves in most of my illustrations. Always begin with the stem, then draw the outline of the leaf shape before adding details like veins or patterns.
Embellish the leaves on these garlands with inky details or a splash of color.

**Idea:** Try adding your name or an inspiring quote inside each of the garlands.
